Getting Started

Backlink Generator software has been preloaded with 700+ urls for you to get started. Of course add more if you found more statistic sites. The software uses internet connection, so be sure that you are connected to the internet.

The first thing you would like to do is definitely have a website with on-page SEO already applied. Here's a simple checklist to help you with your on-page SEO:

– Keyword(s) on Title tag <title>

– Metadata (description and keywords)

– H1, H2, H3 tags

– Keyword density (this is not really important nowadays but just make sure you have at least the keywords on your body tag)

– Bold some keywords

– Alt text for image

– Links to other domains that is related to your site/niche (yes, it helps)

– Domain name

– Permalinks (wordpress especially)

If you haven't take note or miss any of the above, you should start applying now.

Once you are satisfied with your on-page SEO, it is time to build some backlinks. However, do take note that this software do not have anchor text backlink, but it is still good for SEO purpose and human traffic.
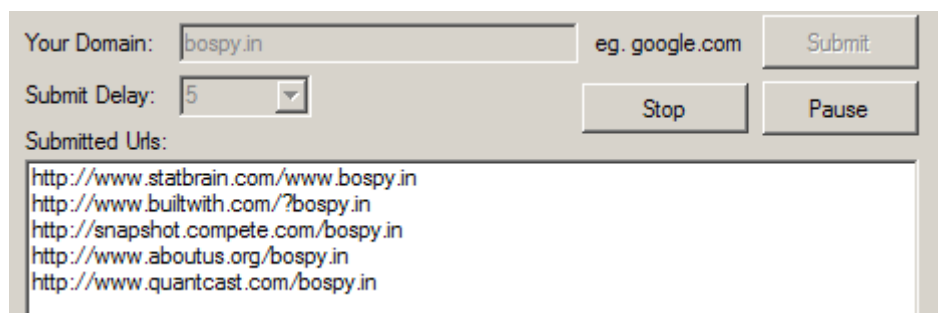

Usage

1) Enter your domain name (eg. Bospy.in, ninja.com, google.com, etc) However, do not put a slash '/' at the end or http:// or www. at the front.

2) Select the 'Submit Delay' (in seconds), 5 seconds is recommended

3) Click on 'Submit'

Your Domain:	bospy.in	eg. google.com	Submit
Submit Delay:	5		

4) You will see a 'Stop' and 'Pause' button for you to pause or stop whenever you want

5) Other that that, you will be able to see the submited urls

Your Domain:	bospy.in	eg. google.com	Submit
Submit Delay:	5	Stop	Pause
