

# WPLogin Pro Plugin Installation

## Server Requirements

1. You will need your own Wordpress blog, version 3.1.3+: It may work with older versions of Wordpress but it has only been tested with the latest version 3.2
2. PHP 4+

## Installation

1. Unzip the download file. It contains one folder called 'whitelogin'.
2. Upload the entire /whitelogin/ folder to your /wp-content/plugins/ folder. Do not change the folder name and ensure that you maintain the folder and file structure

## Activate Plugin

Activate the plugin through the 'Plugins' menu in WordPress

## Edit and Update Your WP Login Page

Go to the 'Login Page' admin page in order to edit and enable your customized login screens

That's about all to it.

I hope you'll enjoy using WPLogin Pro.
