Installation Instructions

Step 1 – Finding The Config File

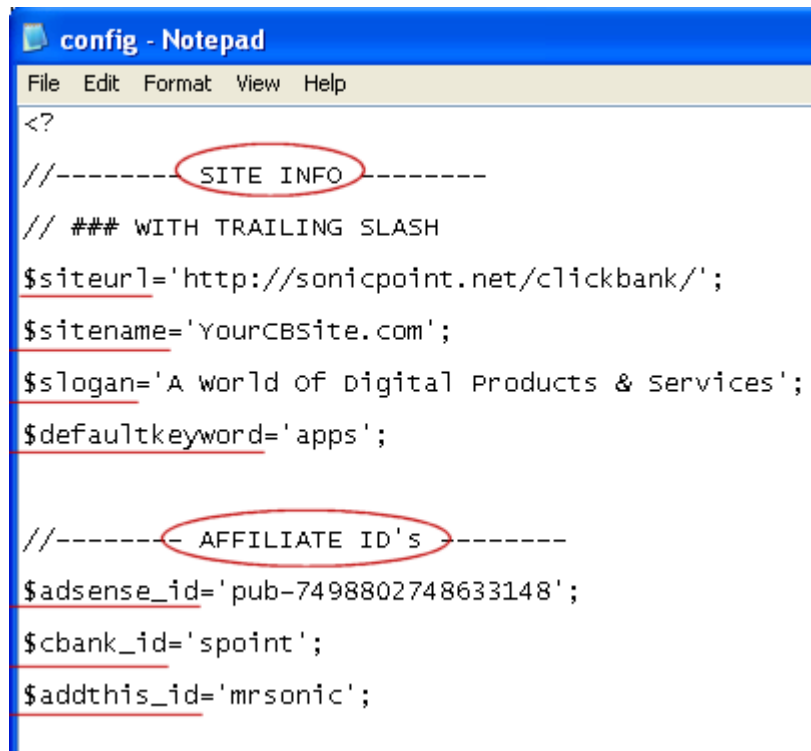

Look in the directory where you unzipped the file and locate the config.php file.

Right-click on the config.php file to Open the file with your text editor software. If you're asked to choose the software, select Notepad.

Step 2 – Editing The Config File

There are only 7 changes in the config.php file.

```
<?
//----- SITE INFO -----
// ### WITH TRAILING SLASH
$siteurl='http://sonicpoint.net/clickbank/';
$siteName='YourCBSite.com';
$slogan='A world of Digital Products & Services';
$defaultkeyword='apps';

//----- AFFILIATE ID'S -----
$adsense_id='pub-7498802748633148';
$cbank_id='spoint';
$addthis_id='mrsonic';
```

Only edit what's between the quotes (either single ' or double " quotes). Otherwise the site may not function. To edit, click your mouse cursor between the first quote and the letter. Then repeatedly press the delete button until all letters are deleted. Be sure to leave the second quote. Then type your values.

Your Site URL: replace our site with your site. Be sure to keep the http:// and WITH TRAILING SLASH. For example you do this – <http://zakdigital.com/> *not a naked address like* <http://zakdigital.com>

Your Site Name: replace or keep the name if you like it. Most people replace it if you have a related domain name like zakDigital.com

Slogan: this is displayed in the header under your site name. Make it something snappy. Or leave it.

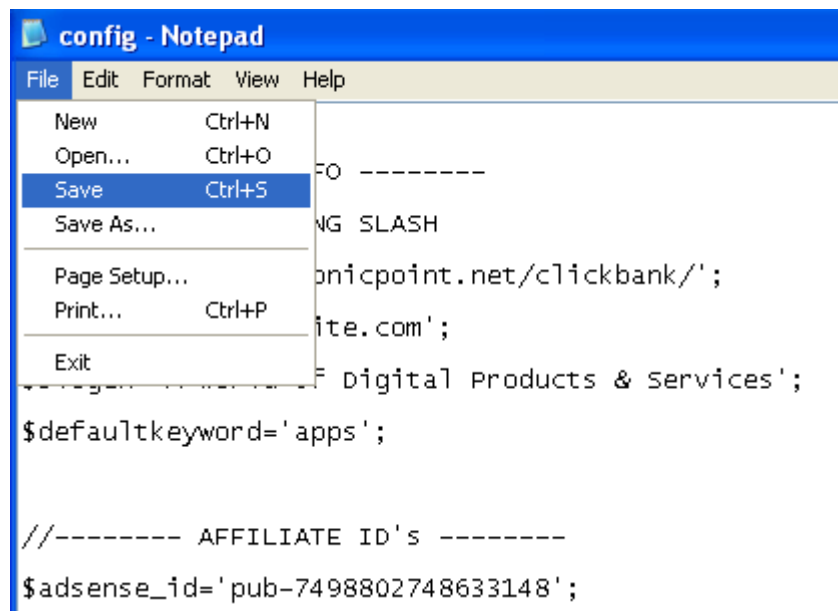

Default Keyword: this is the keyword used when your site is accessed without clicking the sidebar menu or if someone puts “garbage” in the search box.

AdSense ID: make sure you keep the pub- portion of the ID. To find your ID, login to your account and look in the upper right corner. Get a free account at <http://adsense.google.com>

AddThis ID: this is the social bookmark links you see on the site that start with “Share |” followed by small icons for Facebook, Twitter, etc. Grab your free ID at <http://addthis.com>

Clickbank ID: If you don't have your Nickname or ID, register free at <http://sonicpoint.net/cbank.php>

Click File|Save

Step 3 – Uploading To Your Server

Upload all files and folders (*a/k/a directories*) keeping the same structure. You **do not** upload the folders labeled *instructions*, *license* or *salespage*.

1. Upload *all* **.php, .html** in ASCII/Text format. If you're using FileZilla, CuteFTP or a web-based solution, they usually are set correctly so you simply upload everything.
2. Upload all image files (**.jpg, .png, .gif**) in *Binary* mode.
3. Point your web browser to YourCBSite.com and test your site.
- 4.

That's it!

If you need installation, send \$17 via [Paypal](#) to support.dave@sonicpoint.net.... Include your FTP login information and what directory you want the site installed in.
