Installation Instructions

Step 1 – Finding The Config File

Look in the directory where you unzipped the file and locate the config.php file.

Name	Size
instructions	
license	
marketing	
salespage	
brakes-on-cancer.php	4 KB
breast-cancer-awareness-n-y...	4 KB
breast-cancer-info-important....	5 KB
breast-cancer-news.php	3 KB
breast-cancer-pregnancy.php	5 KB
breast-cancer-problems.php	5 KB
breast-cancer-ribbon.php	5 KB
breast-cancer-survival.php	4 KB
breast-cancer-vs-fibrocystic-...	4 KB
config.php	2 KB
coping-with-a-mastectomy.php	7 KB
footer.php	2 KB
google468x60.php	2 KB

Right-click on the config.php file to Open the file with your text editor software. If you're asked to choose the software, select Notepad.

Step 2 – Editing The Config File

There are only 7 changes in the config.php file.

```
config.php - Notepad
File Edit Format View Help
<?

//----- SITE INFO -----
// ### WITH TRAILING SLASH
$siteurl='http://sonicpoint.net/breast-cancer/';
$siteName='YourSiteName.com';
$slogan='Breast Cancer Awareness Guide';

//----- AFFILIATE ID'S -----
$adsense_id='pub-7498802748633148';
$amazon_id='sonicpocom-20';
$addthis_id='mrsonic';
$cbank_id='spoint';
```

Only edit what's between the quotes (either single ' or double " quotes). Otherwise the site may not function. To edit, click your mouse cursor between the first quote and the letter. Then repeatedly press the delete button until all letters are deleted. Be sure to leave the second quote. Then type your values.

Your Site URL: replace our site with your site. Be sure to keep the http:// and WITH TRAILING SLASH. For example you do this – <http://yoursite.com/> not a naked address like <http://yoursite.com>

Your Site Name: replace or keep the name if you like it. Most people replace it if you have a related domain name like FastPublicRecords.com

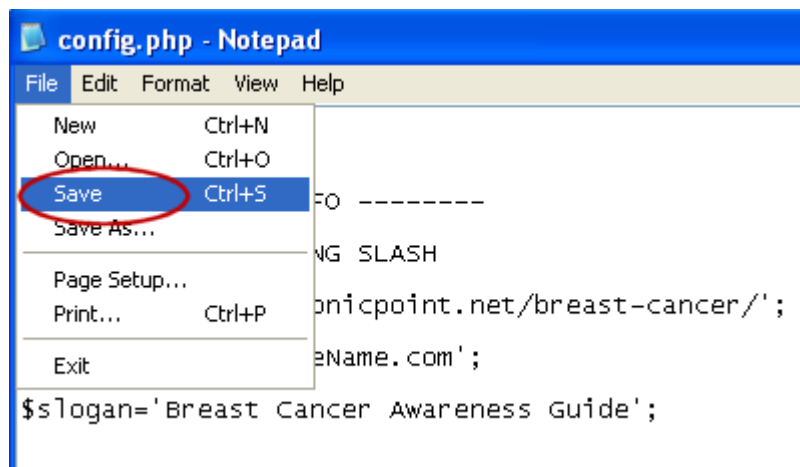

AdSense ID: make sure you keep the pub- portion of the ID. To find your ID, login to your account and look in the upper right corner. Get a free account at <http://adsense.google.com>

AddThis ID: this is the social bookmark links you see on the site that start with “Share |” followed by small icons for Facebook, Twitter, etc. Grab your free ID at <http://addthis.com>

Amazon ID: It's best to login and create a new campaign ID for tracking purposes. Once created, use that ID for your Amazon ID on your new site. If you need an Amazon ID, go to <http://affiliate-program.amazon.com> .

Clickbank ID: If you don't have your Nickname or ID, register free at <http://sonicpoint.net/cbank.php>

Click File|Save

Step 3 – Uploading To Your Server

Upload all files and folders (*a/k/a directories*) keeping the same structure. You **do not** upload the folders labeled *instructions*, *license* or *salespage*.

1. Upload *all* **.php**, **.html** in ASCII/Text format. If you're using FileZilla, CuteFTP or a web-based solution, they usually are set correctly so you simply upload everything.

Upload all image files (**.jpg**, **.png**, **.gif**) in *Binary* mode.

Point your web browser to YourJobSite.com and test your site.

That's it!

If you need installation, send \$17 via [Paypal](#) to support.dave@sonicpoint.net....

Include your FTP login information and what directory you want the site installed in.
