While it has been maintained that it is a world for the masculine, the main precepts of Feng Shui are actually more tailored to suit male, establishing them as the strong ones in the spectrum of life.

The Feng Shui concept is already organized in its scope. Any individual you ask about Feng Shui might tell you its symbols: the bagua, the yin and yang diagram and the charms used by Feng Shui experts to cancel bad luck. Chapter 6:

Physical, Emotional And mental Healing

Synopsis

There are many ways to treat a negative physical or mental condition today. The holistic approach, the scientific approach, the traditional approach and of course the ever present exploitation approach.

Hence in order to find the best and most suitable style to appeal to the individual's circumstances, spending some time doing a little research is well worth the time and effort.

When the topic of health is discussed, most references are made to the physical body conditions. Illnesses, ailments, and diseases are almost always thought of as a "body" medical problem.

Of late however, a lot of research done has pointed to or focused on the fact that the mental state of an individual directly impacts the physical state.

The basic idea of yin and yang are the principals of harmony and balance. Both these elements combine opposing yet complementary forces to create the balance needed for the optimum functioning of any living entity.

All The Areas

The yin and yang way of approaching the healing issue or process has been around for a long time. Originating in ancient china this art form of healing and generally keeping a balanced and happy existence was very common.

Today more and more people are seeking such forms of treatment when faced with problematic physical and mental conditions, as these present a new approach, as opposed to the medical methods available.

Simplifying the explanations regarding the processes or treatment styles, allows the individual with limited prior knowledge on yin and yang to gain more insight into this art form.

By applying the principles of yin and yang effectively, many aspects like nutrition, complementing medications, life style practices, metabolic rates all play an important part in creating the balance for the healing process to begin and end successfully.

Most of the imbalances are centered around the negative energy it carries, thus commencing programs like detoxifications are also recommended.

Another recommendation is to keep the attitudes and mindset always in check in favor of balancing the mental harmony of an individual.

Some advocate balancing yin and yang by reducing stress levels through regular exercise routines, spiritual development, removal of toxic metal and chemicals build ups from the body system regularly. All these elements, when corrected or kept in check, should translate to a more balanced yin and yang scenario, thus creating the perfect harmony existence.

The negative emotional state of mind actually directly affects all levels of the physical state of the body. Tense muscles are also a very yin and yang thing. The tension is like a compressive force – yang, and this eventually changes to yin when the tension causes the blood flow to be effected.

To counter effect this, certain breathing exercises are done. These breathing exercises are meant to bring the tense muscles back to a more relaxed state, creating a balanced emotional state, thus restoring the yin and yang balance.

Stress is also another by product of emotional problems. These emotions are scientifically described as electronic pulses – energy, that connects to the human brain. It has also been scientifically proven; that these thought processes are linked to the chemical balance or energy balance in the body.

Negative emotions are considered yang, which, through chemical changes produces the negative destructive energy referred to as yin.

By practicing techniques such as meditation and hypnosis, the spiritual awakening can be invoked and thus the brain learns to send messages to the body to calm itself. The brain has the necessary positive energy thoughts to remove all negative emotions and replace it with relaxed energies.

It should be properly understood that these opposing elements cannot exist without the other; neither can an entity only consist of one element. Acknowledging that the presence of the yin and yang concept is must always be kept in balance, the mind set and emotions must be addressed.

Each entity is said to consist of five very important elements. When all five elements are working in harmony there is a balance of yin and yang. This scenario ensures the mental condition of the individual is at its best.

Usually when an imbalance occurs a diagnosis must be made to isolate and treat the particular imbalanced element, which is now the weak link in the otherwise complete cycle.

When there is free flowing chi energy though all the five elements, then the body is in balance but when the chi energy blocked, usually brought on by anger, over-excitement, emotional stress, self pity, deep grief and fear, treatment must be sought to recover the balance of yin and yang.

Some of the methods available to help successfully restore the yin and yang balance are acupuncture, massage, meditation, acupressure, or just plain rest.

Using the yin and yang color therapy is also a good way to bring about mental healing. Certain colors can invoke emotions and different mental states. In fact there is a certain energy level that even colors have.

Bright vibrant colors are more yang while the cool, cloudy colors are yin. The right color combination suited to the individual can bring about the yin and yang balance and create the platform for good mental health.
