How to Set-Up An Iframe App For Facebook To Work With Your Facebook iFrame Made EZ Wordpress Plugin

Step 1

Go to <http://Facebook.com/developers>. If you have not already granted developers access to your Facebook profile you will be asked to do so.

At the top right of the page Choose Set up New App

As per Image Below

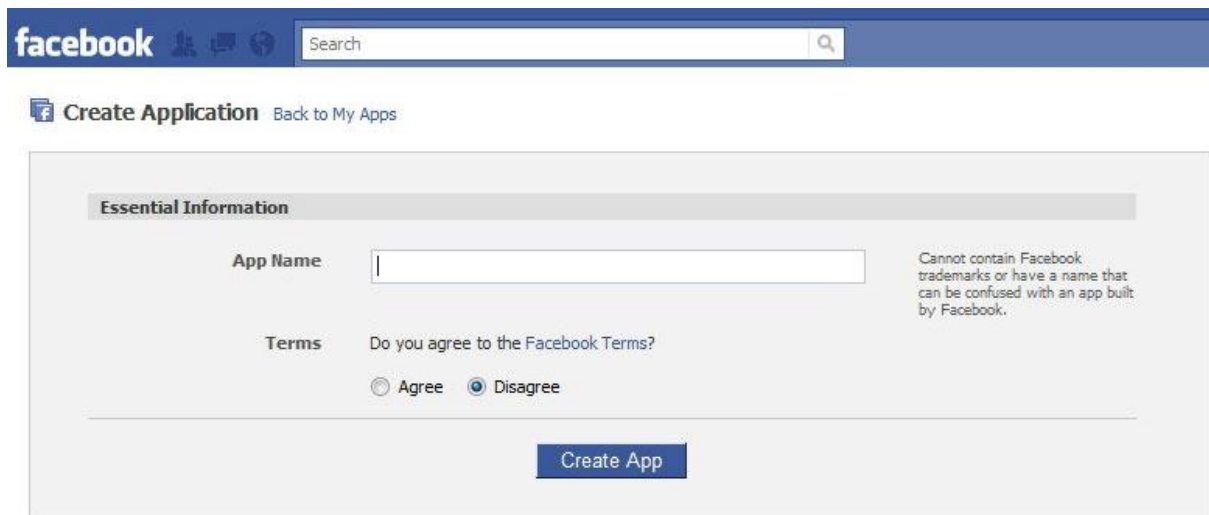

The screenshot shows the Facebook Developers page. At the top right, there is a button labeled '+ Set Up New App'. Below the navigation bar, there is a 'News' section with a post titled 'Platform Updates: Operation Developer Love' by Yasser Shohoud, dated Friday, with 1155 shares. Below the news section, there is a section titled 'HTTPS URLs for Page tabs' which explains the new 'Secure Tab URL' field in the Developer App. To the right of the news section, there is a 'My Apps' section with a 'See My Apps' link. At the bottom of the page, there is a diagram showing a notification in the Facebook interface. The notification says 'Douglas Purdy sent you a request in My Great Canvas Application.' and is dated '15 minutes ago'. A blue arrow points from the notification to a preview of the 'My Great Canvas App' interface.

Step 2

Choose a name for your app and agree

Read Facebook Terms

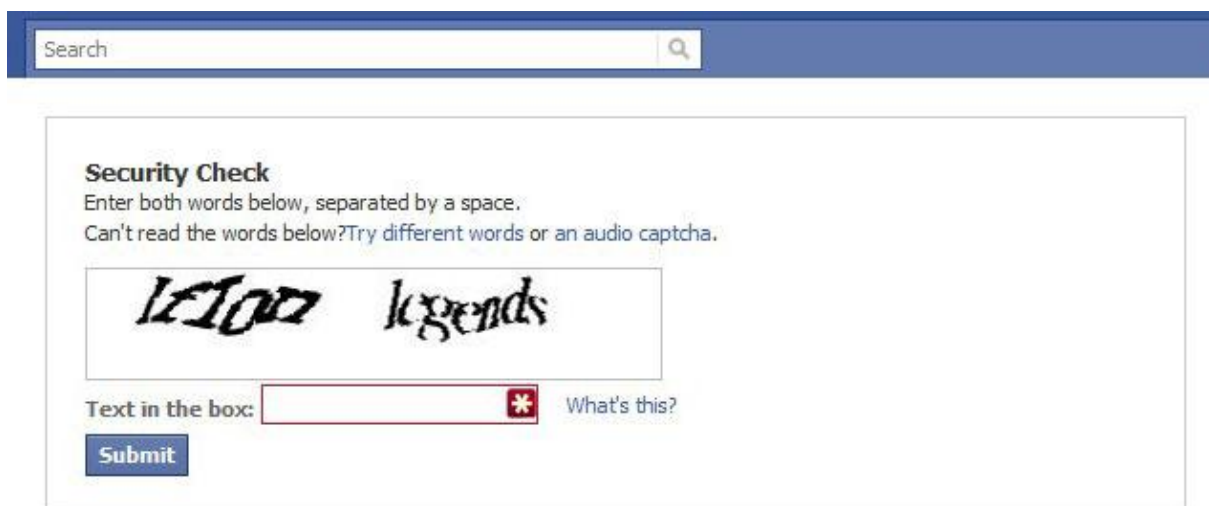

Agree

The screenshot shows the Facebook 'Create Application' interface. At the top is the Facebook logo and a search bar. Below the header, there are links for 'Create Application' and 'Back to My Apps'. The main section is titled 'Essential Information' and contains two fields: 'App Name' with an empty text box, and 'Terms' with a question 'Do you agree to the Facebook Terms?' and two radio buttons, 'Agree' and 'Disagree'. A note on the right states: 'Cannot contain Facebook trademarks or have a name that can be confused with an app built by Facebook.' At the bottom right is a blue 'Create App' button.

Step 3

Enter Captcha and Submit

The screenshot shows the Facebook 'Security Check' page. At the top is a search bar. Below it, the 'Security Check' section asks the user to 'Enter both words below, separated by a space.' and provides a link for 'Can't read the words below? Try different words or an audio captcha.' The image shows the words 'lemon' and 'legends' in a stylized font. Below the image is a text input field with a red asterisk icon and the text 'What's this?'. At the bottom left is a blue 'Submit' button.

STEP 4

Edit Thai Silk Magic [Back to My Apps](#)

The screenshot shows the 'Basic Information' section of the Facebook App Settings. On the left is a sidebar with navigation links: 'About' (highlighted), 'Web Site', 'Facebook Integration', 'Mobile and Devices', 'Credits', and 'Advanced'. The main content area contains the following fields and options:

- Application Name** (1): A text input field.
- Description** (2): A text area for a plaintext description.
- Icon** (3): A field with a gear icon and a 'Change your icon' link. The icon is a blue square with two white gears.
- Logo**: A field with a 'Change your logo' link.
- Language** (4): A dropdown menu currently set to 'English (US)'.
- User Support Address** (5): Radio buttons for 'Email' (selected) and 'URL'.
- Contact Email** (6): A text input field.
- Privacy Policy URL** (7): A text input field.
- Terms of Service URL**: A text input field.
- Manage Users** (8): A section with a 'Remove' button, a role dropdown set to 'Administrator', and an 'Add User' field with the placeholder 'Start typing a friend's name'.

Helpful text is provided for several fields: 'Cannot contain Facebook trademarks' for Application Name; 'Appears next to your app name throughout Facebook (16x16)' for Icon; 'Appears in authorization dialogs, search results, and the app directory (75x75)' for Logo; 'The native language of your app.' for Language; 'The email address or URL where users can contact you about your app.' for User Support Address; 'The email address where Facebook can contact you or your company' for Contact Email; 'All apps must have and display a Privacy Policy. For more information, please visit our Platform Policies.' for Privacy Policy URL; 'The URL to your app's Terms of Service, used in the permissions dialog.' for Terms of Service URL; and 'The users associated with your app and their roles' for Manage Users. A 'Save Changes' button is at the bottom.

1. Application Name is filled out so just check you are happy with it.
2. Write a description
3. Choose a favicon to go on the fanpage (optional)
4. Choose your language
5. Choose whether you want support to go to a URL or an Email
6. Modify your Address/email for support and contact email accordingly
7. Enter your Privacy Policy URL
8. Add additional users to the app if you want to

Step 5

The screenshot shows the Facebook App Settings page with the following sections and annotations:

- Core Settings** (Annotation 1):
 - Application ID (Annotation 1)
 - Application Secret (Annotation 1)
 - Your OAuth client_id (Annotation 1)
 - Your OAuth client_secret (Annotation 1)
- Canvas** (Annotation 2):
 - Canvas Page (Annotation 2): `http://apps.facebook.com/`
 - Canvas URL (Annotation 3)
 - Secure Canvas URL (Annotation 3)
 - Canvas Type (Annotation 4): ☒ IFrame ☐ FBML
 - IFrame Size (Annotation 5): ☒ Show scrollbars ☐ Auto-resize
 - Bookmark URL (Annotation 10)
- Discovery**:
 - Social Discovery: ☒ Enabled ☐ Disabled
- Page Tabs** (Annotation 6):
 - Tab Name (Annotation 6)
 - Page Tab Type (Annotation 7): ☒ IFrame ☐ FBML
 - Tab URL (Annotation 8)
 - Secure Tab URL (Annotation 9)
 - Edit URL (Annotation 10)

At the bottom, there is a **Save Changes** button.

1. Take a note of your application ID for the Wordpress post
2. Use the Url of your website (e.g. `http://yourdomain.com/fanpage/` (
3. If you have a Secure URL (One with https use that here)
4. Choose Iframe as Canvas Type
5. Choose Auto resize assuming you dont want scroll bars
6. Choose What you Want the Page tab to be called
7. Check this is Iframes...
8. For the Tab URL Enter where you want the page to come from. (This so for example: www.yourdomain.com/fanpage/tabname
9. Where relevant enter the url you want the secure tab to come from
10. Click Save Your app is complete.

Step 6

 My Apps + Set Up New App

Changes saved. Note that your changes may take several minutes to propagate to all servers.

Directory Status: Not Submitted
Once you have completed your app, you may **submit it** to the App Directory.

Delete App

On the right hand side Choose Application Profile Page

Step 7

On the left hand side of this image you will see Add to my Page and this is what you need to use to add the app to Facebook.

The screenshot shows the Facebook 'Get Started' interface for a new app. On the left is a sidebar with navigation links. The main area contains a 'Welcome' message and a five-step guide to get started.

Left Sidebar:

- Get Started** (selected)
- Info
- Wall
- Discussions
- Reviews

Post Update
- 5 Promote this Page on your website**
Add a Facebook Like Box to your site and give people an easy way to discover and follow this Page.

Step 8

Choose which of your pages you would like to add your new tab to and you will now have a menu item on your Facebook page which will give you the same content as you chose to pull it in from in as per Step 5 No. 8 (www.domain.com/fanpage/tabname)

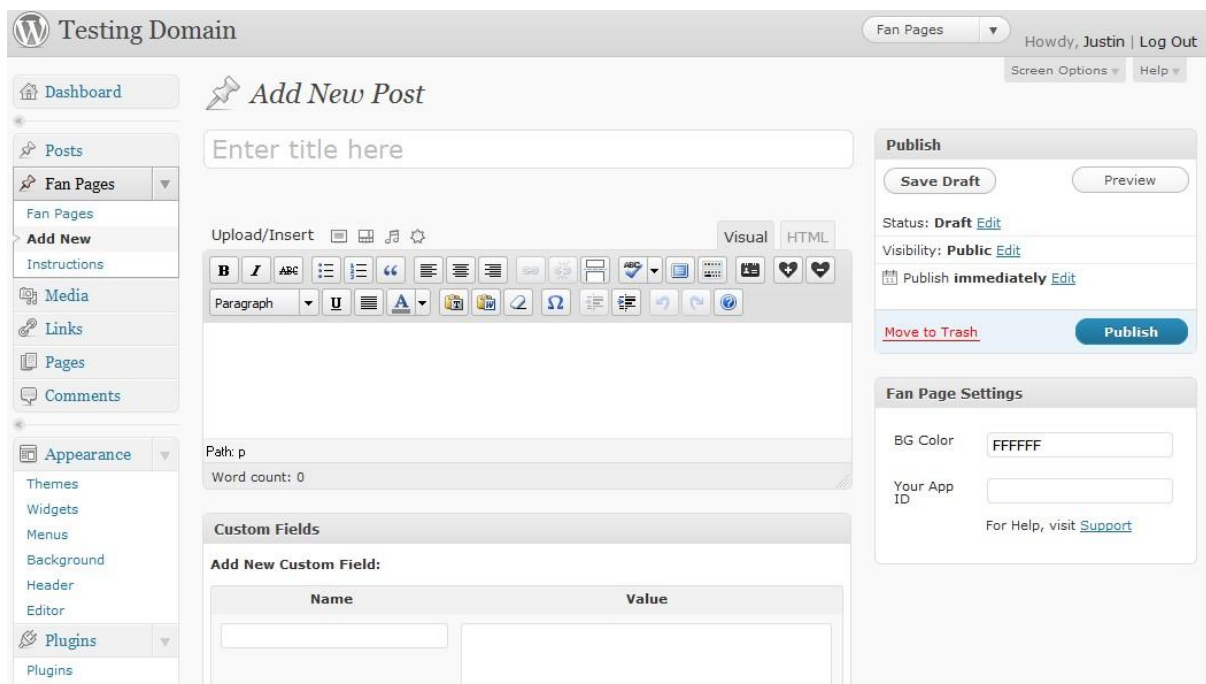

Step 9 – Integrating with Wordpress

You now need to go to your wordpress blog and set up a fanpage.

With our plugin once you have installed and activated it you have a new fanpage section on the site.

It should look something like this:

On the right hand side you will see the fanpage settings where you can choose the different background colours for the tabs.

This is also where you should put in your App id.

In this plugin three additional tabs have been added. One to add in your custom autoresponder code. And then two hearts which you can use to show which parts of the page should be seen when you like a page or stop liking a page.

You would then create and publish the post.

The permalink should look something like what you used within Facebook for the taburl. Ie: <http://www.yourdomain.com/fanpage/tabname>.

As you get more proficient with this process the time taken to set up fanpages can be really quite fast!
