About Me

I am a 30 year old stay-at-home mom by morning and a turbo-boosted internet marketer by night!

My journey takes me from being utterly frustrated, lurking on forums, reading about the internet riches and just silently wishing I had it as well. But after reading method after method, reports after reports I realized I was still where I was without even a reasonable amount of success, well maybe a little, after I made \$2.25 on an email sign-up!

Basically, my situation taught me to devise my own methods based to what I had learnt so far and making sure they work.

This is how things came into creation. I present all my methods in a very detailed and simplest possible manner and hope you enjoy this simplistic approach to internet marketing that I have outlined in my products.

Thank You

Hana SK

1.A Market Conqueror

I have created this product by testing and re-testing it uncountable times. Yes, that's right I call this product, 'The Market Conqueror'. The reason behind this is that I have actually found numerous avenues by which I have had the pleasure of earning quite a lot of money.

I haven't had to do any SEO based methods by which I would have to keep writing articles and backlinking or I haven't had to keep making friends and socializing with the hope that maybe they will be kind enough to like my page and ultimately traffic may start trickling in on my website.

Now, you must be wondering how such a product can improve your earnings or even start to bring a considerable amount of money in your bank account.

Well, with the market conqueror you basically do what it says- you eventually grab hold of all those ways or avenues, to make you money. So it is a multiple avenue money making machine! And all these avenues pretty much make up most of the market, and I will teach you how to conquer this heavy part of the market.

Thus making you a, '***Market Conqueror***'

2. What Is A Business In A Box?

Basically in this product I have literally put a mini business in a box for you. Having said that, it honestly means that you would simply have to follow the procedures and steps given inside to achieve a good amount of income on a monthly if not on a daily basis. This product is a complete package and not an outer shell.

So, I have put together a whole method and devised a software as well as a case study which will enable you to get desired results. And hey, scaling it always helps.

Bottom line, what this product does is:

“Get a HIGH INFLUX OF FREE AND TARGETED TRAFFIC WITHIN HOURS”

In the internet marketing business, ***one thing matters most of the time.***

TARGETED TRAFFIC!

So lets go make ourselves some money!

3. Ways To Conquer The Market **(money making avenues)**

A market conqueror basically spreads his or her wings over a large range of products and services to make sure, that he or she ends up with a good number at the end of the day. He or she won't ever put emphasis on just one thing, rather the monetization will be scaled to a maximum potential possible. I shall now describe this in detail for better and a clearer picture.

And as much as I would like you to focus on only one avenue of money making, I would really love for you to explore multi faceted marketing paths. The reason behind this is that, the method I have devised, just brings so much traffic that it would be a shame if you concentrated just on one thing.

We will make money in the following ways:

- **C.P.A (Cost Per Action)**- CPA stands for Cost Per Action and it refers to a type of marketing that usually involves you generating leads for companies and in turn, those companies giving you a small payment for each lead. It works like this-You generate traffic from legitimate sources that the offer in your network allows, and then you

simply direct that traffic (geo targeted) to the respective offers. Place a banner(s) or links to your offers and earn \$\$\$.

- **Google Adsense**-Google Adsense is a program run by Google which lets website owners to put advertisements(text,image,video) that are targeted to site content and audience. You have to apply for an account and once set up, whenever someone clicks or views your advertisements, you get paid. Not bad for income on auto pilot!
- **Amazon products**- The world's largest online retail store selling everything from CDs, DVDs to furniture! Simply sign up and get an account, get a targeted website for a targeted audience, put in your amazon affiliate links and you're done. Watch the moolah come in!
- **Clickbank digital products**- The world's largest digital product store. This is one of the first websites which had a strong as ever relationship between the vendor and the affiliate.Up until now and counting, affiliates have been paid more than 2 Billion dollars! Get good targeted traffic on your site and watch your numbers soar high!
- **Commission Junction**-Another online company concentrating on selling digital products. Heavy sales come in from affiliates and it is very lucrative once you get the magic power "T"= traffic!
- **Youtube video marketing**- If you like making videos then create them based on subjects which interest and intrigue you, since you want to give your 100% here. Upload them to youtube as well as put them on to your own website for maximum exposure. Once your

website starts getting great exposure so will your videos and that's a lethal combination! It will double your cash in no time.

- **Facebook and Twitter- Social Media Exposure.-**
Integrate your website with Facebook as well as with Twitter accounts. Get followers and go for the full on exposure to your website, products and make a name for yourself in your chosen niche. This is where product creation comes in, because once you have an established audience as well as great credibility, marketing your products will pose no problem.
- **Your own products and services-** Maybe you have your own products, reports or even a special consultancy service you've desined and would like to extend your services to your targeted audience in your niche. A great deal of traffic helps here and you go smiling all the way to the bank, not to mention the ever lasting grin on your way back home!
- **Selling Banner Ad space-** Once you start getting great exposure to your website(s), you will start to monetize or make money through this traffic by selling advertising spaces on your site. People who have similar products as your targeted audience, will pay you weekly or daily (depending upon you) just to place their ads on your website. Talk about another great way of earning on autopilot!

So from the numerous listed ways to make money, what do we see in common amongst all of them?

Heavy flow of targeted traffic!

In the next few pages I shall show you how exactly I got 500 unique visitors to my websites after 3 hours of work. Now, since I am a very impatient person with regards to doing SEO and monitoring my website etc etc, I get bored too easily.

Within 3 hours of work, I made my first sale on Clickbank worth \$37 and two adsense clicks! I was thrilled since now I knew this method worked.

So what I did was scale this method 10x and now I make a handsome amount daily.

Check out my screen shot given below, it shows just how many visitors are coming to my website exactly after I set it up in 3 hours and this screen shot was taken exactly 48 hours later.

4. *Pinterest*

This is what you will need for my power packed method!

Pinterest is the latest social media network to enter the market and has created a rage in the industry. People are pinning throughout the day, pinning pictures, commenting on other people's pins (pictures), repinning (same as re-tweeting) them, adding new pins to their boards (sort of a personal wall) and you can have more than one board.

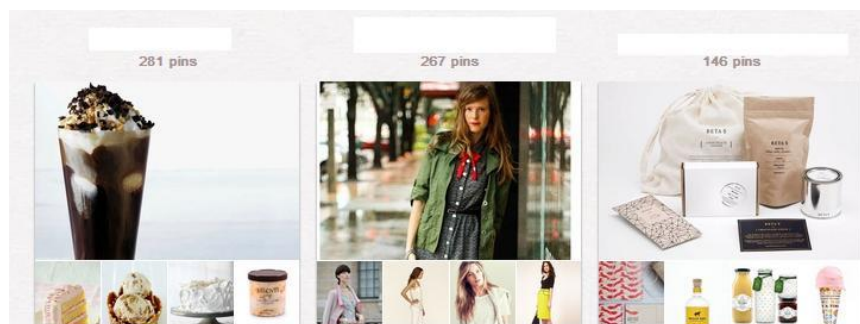

It is though Pinterest that I have built a small empire of websites earning me anywhere between \$250-\$700+ daily!

To get on Pinterest you need to be invited either by Pinterest or by someone you know who has a Pinterest account. You can even shoot me an email ☺ and I shall invite you for immediate access.

You can then login through Facebook or Twitter or even directly as per your wish.

Once you have an account, you can start creating a board based on your likes for eg: food & drinks, technology etc.

The more you pin, the more followers you get. So the idea is to get an account on Pinterest and start pinning photos or pictures you find amusing or inspiring or just that makes you smile, ultimately putting them on your board like how I have done in the above screen shots.

A few things you must get familiarized with on Pinterest are:

Pins: Pictures that a user posts on his or her board. The best part is all the pins have the source from where they were pinned- A Website!

But please make sure the pins are related to the boards, we don't want a Mac& Cheese pin on a Cars& motorcycles board!

Boards: A virtual board where pictures are pinned based on the category of the board. For eg: Food & Drinks Board will have similar pins.

Repins: When a user uses an already pinned picture and puts it back on his or her own board. This gives the pin more exposure and makes it more popular. So the more repins you have, consider your pins getting more exposure.

Pin It Tool: It is extremely important that you paste the 'pin it' tool to your bookmarks because no matter which website you are on, you can directly use this button and pin directly on to your boards.

For more information and step by step method on how to set up your pinterest account please watch Video no 2.

5. in-Twist!-

in it with a twist'!

This is where I show you how we make that astounding number with regards to our traffic audience!

Not only will they flock your website but they will make you money in a matter of hours!

Now I wouldn't ever advise you to misrepresent yourself and open multi accounts on Pinterest and start spamming.

We want to keep it safe, enjoyable yet extremely profitable at the same time.

I am sure you know that a website is of utmost importance here. If you don't have a website please refer to my wordpress website set up guide.

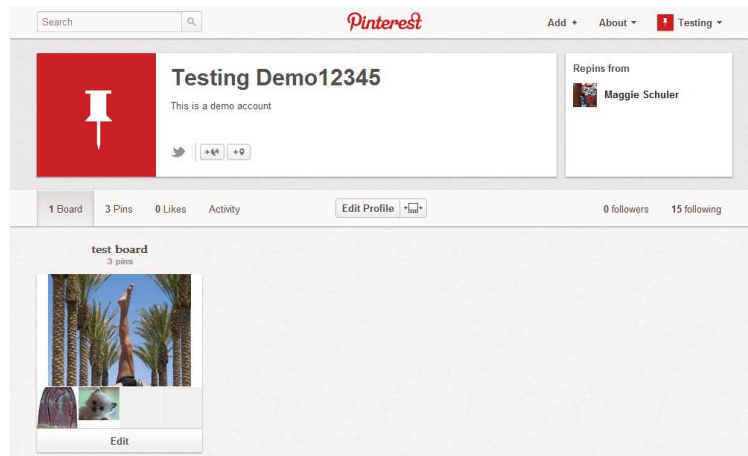

[I have provided a detailed video no 3 for this method as well]

Alright let's go make ourselves some serious cash!

Log into your Pinterest account.

Go to your profile page.

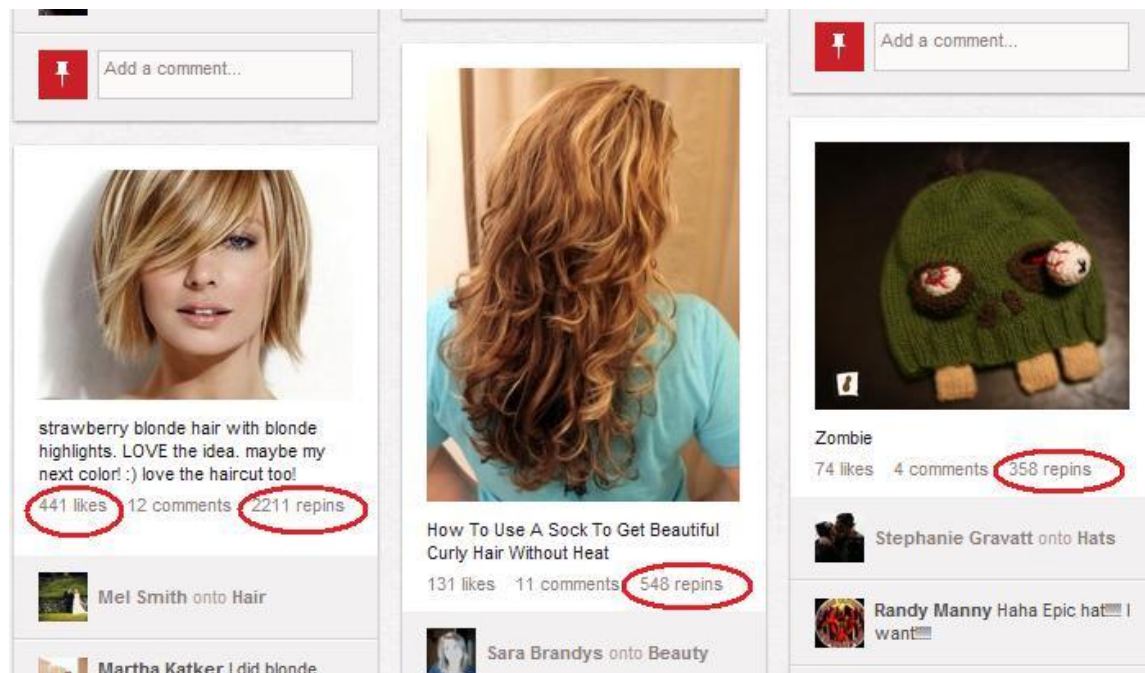

From your profile page click on the Pinterest logo and please go to the home page. When you are on the home page, you will see a popular page option. Please click on that.

After you click on the popular page, you will be taken to a page which will contain all the most popular pins related to your chosen categories. These pictures are extremely popular & have great exposure.

In the above picture you can see just how popular the pins are. With as much as 2000+ repins and this is very normal.

What we do now is download one of these very popular pics on to our desktop.

I will use the picture of the lady with short blonde hair that you see above. I'll save it on my desktop and then upload it

on to my website and write a few lines around it and link it to a hair product offer!
