

This info comes “uncut” from the developer

**This isn't just any AdSense Theme pack, this is a recipe for a full time income source. All the ingredients are provided to generate hundreds, thousands, or tens of thousands in AdSense revenue per month. We've created the Goose that lays the Golden Eggs, it's up to you to feed it and nurture it - treat it right and it will lay Golden Eggs for you!**

Imagine creating a healthy full time income from just 10 AdSense websites. We've managed to source 545 key phrases that are virtual AdSense gold, and have the potential to allow you to do just that.

Each key phrase has a minimum estimated CPC of \$20, moving right up as high as \$56.12. With the estimation that an AdSense publisher can expect to receive approximately 10% of CPC, that puts every one of these key phrases at roughly **\$2 to \$5.50 per click.**

To get you off to a flying start with attacking these golden key phrases, we've created ten niche Wordpress themes, purpose built to make it easy for you to start targeting these key phrases and generating AdSense “golden eggs”. Each theme comes with it's own dedicated, niche specific list of high paying keywords. All you need to do is setup one WordPress site with each theme, and base your content on the included list of key phrases. Use your preferred method of traffic generation, and watch those big value clicks come in.

To put things in perspective, lets run a couple of numbers. Say for example you set up your ten sites, add content and start driving traffic. In the beginning, you get one click a day on each of your ten sites. With an estimated \$2 to \$5.50 for each one of those clicks, you will already be earning **\$20 to \$55 per day, or \$600 to \$1650 per month.** That's just from one click a day on each site!

Let's say you then hone your technique and your approach, and you build your ten sites up to the point where each is getting 10 clicks per day. Still a relatively small and achievable number of clicks. But when you are targeting these keyphrases, 10 clicks per day on each site will equate to between **\$200 and \$550 per day, or \$6000 to \$16500 per month!**

The numbers on each niche:

- Niche One - **58 keyphrases**, estimated CPCs from **\$20.00 - \$38.12**
- Niche Two - **61 keyphrases**, estimated CPCs from **\$20.44 - \$41.73**
- Niche Three - **35 keyphrases**, estimated CPCs from **\$20.88 - \$40.11**
- Niche Four - **39 keyphrases**, estimated CPCs from **\$21.54 - \$46.15**
- Niche Five - **68 keyphrases**, estimated CPCs from **\$20.09 - \$39.62**
- Niche Six - **62 keyphrases**, estimated CPCs from **\$20.40 - \$47.19**
- Niche Seven - **79 keyphrases**, estimated CPCs from **\$20.82 - \$45.00**
- Niche Eight - **29 keyphrases**, estimated CPCs from **\$23.78 - \$54.61**
- Niche Nine - **62 keyphrases**, estimated CPCs from **\$20.06 - \$52.93**
- Niche Ten - **52 keyphrases**, estimated CPCs from **\$20.29 - \$56.12**

The PSD's for the headers are included, so you'll be able to give each site your own unique name and branding.

### **The pack include the following features:**

- 10 niche specific high CPC keyword lists: A total of 545 key phrases, with estimated CPCs from \$20.00 to \$56.12
- 10 x Wordpress 2.8 compatible niche targeted themes.
- Each theme has Adsense already in place, just plugin your IDs and the ads are yours.
- Adsense units are optimally placed, for maximum CTR:
  - 728 x 15 Link Unit directly under page menu
  - 160 x 600 Ad Blocks - 1 in each sidebar, aligned to the top and bottom of the content area
  - 468 x 60 Ad Block - located at the bottom of the homepage content area
  - 200 x 200 Ad Block - nestled in the top left corner of each individual post
- Google search integrated, for even more revenue.
- Royalty free, resell friendly images - we've created the graphics by hand, and the images are our own unique 3D renders.
- 10 x header graphics, so you can change the theme names and header presentation.
- Promotional graphics - to help you with reselling the pack we've included a 3D boxshot and the header graphic you see above.

### **ANSWERS TO A FEW QUESTIONS**

Yes the adsense is already positioned for optimum CTR - all you have to do is open up the file named "adsense.php" and punch in your pub-id and tracking channel. There is also a file named "googlesearch.php", where you can paste in your own custom search code as well.

To be honest, I couldn't give you an exact statistic on the CTR improvement of these over a regular theme as they're still pretty hot off the press, but I can tell you this. I spent many hours over a period of many days trawling the web and soaking up every piece of information out there on the premium ad locations for clickthrough.

I have examined every Adsense Theme I could find, read every article (and WF forum post) from users reporting high CTR from various ad locations, and amalgamated their experiences into these themes. The information I've based these ad positions on comes from people making a healthy full time income from Adsense, so I'm very confident that these are high performing layouts.

Also of course the keyword lists themselves are gold. It's not easy to come by keyphrases worth this much, and I've put together 545 of them so you've got plenty to choose from.

Let me know if I can answer any more questions for you!

=====

I haven't included any articles in this package. I thought about it, but when there's 545 different keyphrases to choose from I thought it would be better to let people select the specific ones they wished to target for themselves.

I would say the best approach you could take with this package is to post original content, written either by yourself or a contractor, and also submit those articles to the various article directories. With unique content that is also run through an article marketing process, I would suggest you will have the best results.

If you wish to use the sites on an autoblogging setup, then there are two plugins I would recommend. There may be others, but these are two I've personally used and found to perform well.

One is Feedwordpress, a plugin that aggregates RSS feeds and turns them into posts. You should have no trouble finding feeds to aggregate. I've tried a couple of these aggregator plugins and found this one to be the most stable: [WordPress > FeedWordPress WordPress Plugins](#)

The other is Article Autoposter, now a part of the WP-Robot set of plugins. This plugin will search Article Base for content based on keywords you specify, and post them to your site in accordance with the Article Base terms of use. The free version will auto post based on up to three keyphrases, automatically each day. I actually used the free version to quickly setup the demo site I linked to in the thread. The full WP-Robot version lets you post as many articles as often as you like, and also has autoposting of other content too, such as clickbank, amazon and ebay ads. Here's the plugin page: [Lunatic Studios| WP Article Autoposter](#)

Hope all this "insider" info helps!

Seeking YOUR Success,
